GitLab as a Collaborative Working Environment

Practical 2

Issues, Labels, Milestones, and The Issue Board

Issu	e Creation
	Navigate to the project in which you are the Owner .
	Create a new issue in which the neighbour with Maintainer group role is asked to add a new directory named data together with a README.md file in it.
	Check your email and GitLab To Do page for the notifications.
	Navigate to the issue that was assigned to you. Add a directory entitled data to that project.
	Add a README.md file under the newly created data directory. Mention in the content that it is intended for data results.
	Comment and close the issue that was assigned to you.
Lab	el Creation
	Navigate to the project for which you are the Owner and create the following labels : <i>File handling</i> , <i>Description</i> , <i>Wiki</i> , <i>Started</i> , and <i>Advanced</i> . Make sure that you use different colors.
	Navigate to the closed issue and assign the File handling label to it.
Mile	estone Creation
	Make sure you are under the project for which you are the Owner .
	Create a new milestone entitled Complete description and wiki.
Basi	c Issue Manipulation
	Create a new issue entitled Describe the project under the new milestone . Make sure that the Description label is attached to it and that there is no assignee .
	Comment on the issue that it is too broad and that it should be split into smaller issues.
	Change the title of the Describe the project issue to Finish main README.md.
	Create another issue entitled Make wiki page under the Complete description and wiki milestone. Make sure that the Description and Wiki labels are attached to it and that there is no assignee.
Mile	estone Summary
	Navigate to the Complete description and wiki milestone page and check its summary.
	Click on the Make wiki page issue to go to its main page. Assign this issue to you.

The Issue Board	
-----------------	--

Navigate to the issue board page of the project.
Create two new lists by making use of the $Started$ and $Advanced$ labels.
Add the Finish main README.md issue to the board under the Started list.
